MIXED PAINT CO.

OFFICES: NEW-YORK & CHICAGO.

NATIONAL MIXED PAINT CO.,
90 Nassau Street, New York.

THESE ARE SAMPLES OF **THE PAINT ITSELF** TAKEN FROM OUR REGULAR STOCK.

66	88	CREAM.	89
69	79	77	70
90	87	78	CANARY.
67	71	73	93
76	80	83	84
85	82	86	95

These are equally good for either Inside or Outside Work. We manufacture to order any Tint desired.

In ordering White, specify whether it is wished for Inside or Outside Work.

TDCAT 1875
PAPV038259

FIRST PRIZE AMERICAN INSTITUTE 1874 & 1875.

These Paints are STRICTLY PURE; made of the best quality of

WHITE LEAD, ZINC AND LINSEED OIL

Scientifically combined; and the formulæ by which they are mixed are the result of a lifetime of study and experiment. A single coat of this paint, carefully applied, is far more efficacious than two coats of the best Lead and Oil alone; and it will cover one-third more surface, while its cost is much less. Paints prepared in the old way will soon chalk and rub off; but by our process absorption of the oil is prevented, and a fresh appearance is permanently retained. The pores are filled up, and the surface hardens and becomes absolutely impervious to water, whether on the sea-coast or in the interior. The tints are always uniform, and only the best coloring matter is used. The Paint is

PREPARED READY FOR IMMEDIATE USE.

Requiring neither Thinners, nor Dryers nor any addition whatever:

It being necessary only to open the package and stir contents thoroughly, when it is ready for the brush. It flows evenly and freely and **the most inexperienced person** can apply it. It is very elastic, expanding with heat and contracting with cold, and **will not crack** or rub off, whether applied to Brick, Stone, Plaster, Wood or Iron.

To Ascertain the Amount of Paint you Require:

Add the number of feet, front and rear, to the number of feet in length, both sides; multiply this by the average height; divide the product by nine; then divide by twenty, and the result will be the number of gallons required.

[EXAMPLE.]

Front,	20 feet,
Rear,	20 "
Side,	30 "
"	30 "
	100

Multiply Height, 100 × 20 = 2000

9]2000

20]222 Square yards.

11 gallons in round numbers for 2 coats.

Should the surface be old and very dry, of course the quantity of paint required will be proportionately increased.

☞One gallon of the best Paint mixed in the old way will cover only 16 square yards with two coats, whereas **the National Mixed Paint** will do one-third better as to quantity, and will wear three times as long.

In using the Paint, to secure a satisfactory result, it is only necessary to observe these suggestions; stir the paint thoroughly. Have the surface **thoroughly dry** and free from dirt and scales. Do not paint in extremely cold weather. Let the first coat be thoroughly dry before the second is applied. Before painting walls and ceilings that have been whitewashed or kalsomined remove the flakes entirely, and then apply

Paint and Hardware dealers, also Druggists generally, sell **NATIONAL MIXED PAINT** in any desired quantity.

TAKE ONLY THAT BEARING OUR TRADE MARK,

Else you are likely to have an inferior article imposed upon you. If no dealer in your place has our goods, do not be put off with something else, but **write direct to us.**

These Paints are sold **BY THE GALLON ONLY,** and are put up in packages to suit purchasers: 1, 2 and 3 gallon pails, kegs of 4 to 25 gallons, and barrels of 40 to 50 gallons. We deliver free on board cars or boat.

We are constantly in receipt of letters recommending these paints, and mainly from parties who were induced, only by much effort, to put aside their prejudice against "Mixed Paints." Their lack of confidence had arisen because of a few unprincipled manufacturers offering their cheap and adulterated paints as genuine and reliable goods, thereby causing dissatisfaction and loss. As for the **NATIONAL MIXED PAINTS,** they have given **perfect satisfaction in every case** where used in accordance with the directions. Our formulæ are regular and invariable, and we **know** that with such materials as we use **The Paint Must be Good.** We can give only a few names of our references, (taken at random from our list) here, but we can refer to thousands of others who will testify to their faith in the economy of using these paints in preference to any others.
